Designing the Future explains how world-class companies have turned a deep understanding of customers into winning products and processes. Focusing on Ford's epic transformation, Toyota's continued evolution, and several companies in other industries, the authors provide a detailed analysis of how and why these companies succeeded; they also explain why many companies have achieved only moderate success with Lean. The book describes how companies can connect business strategy and superior value delivered to customers—an iterative, integrated process that relies on simultaneous engineering, linking strategy and

vision.
